

Accounting Audit Report

Automated Anomaly Detection Summary

This report summarizes automated anomaly detection over the uploaded transaction data. The system flags duplicate invoices, negative amounts, missing fields, statistical outliers (both z-score and IQR methods), high-value threshold exceptions, weekend transactions, and empty vendor entries. Use these flags to prioritize review, validate approvals, and improve input controls.

Category	Count
Total Records	6
Duplicate Invoices	2
Negative Amounts	1
Missing Values	1
Outliers (z-score ≥ 3)	0
Outliers (IQR)	1
Over Threshold ($ Amount > 1000$)	1
Weekend Transactions	2
Empty Vendor	1

Recommendations

- 1) Enforce mandatory vendor input and standardized dropdowns.
- 2) Validate unique invoice IDs to prevent duplicates.
- 3) Add threshold-based alerts and second-level approvals for high-value transactions.
- 4) Review weekend/off-hours approvals with audit logs.
- 5) Auto-flag and block uploads with critical missing fields.

Duplicate Invoices

Invoice_ID	Date	Vendor	Amount	Category
INV001	2025-09-01	Starbucks	25.5	Marketing
INV001	2025-09-08	Starbucks	25.5	Marketing

Negative Amounts

Invoice_ID	Date	Vendor	Amount	Category
INV002	2025-09-01	Amazon	-35	Supplies

Missing Values

Invoice_ID	Date	Vendor	Amount	Category
INV005	2025-09-06	nan	150	Equipment

Outliers (z-score ≥ 3)

(none)

Outliers (IQR)

Invoice_ID	Date	Vendor	Amount	Category
INV006	2025-09-07	Cafe Bene	9999	Food

Over Threshold ($|Amount| > 1000$)

Invoice_ID	Date	Vendor	Amount	Category
INV006	2025-09-07	Cafe Bene	9999	Food

Weekend Transactions

Invoice_ID	Date	Vendor	Amount	Category
INV005	2025-09-06	nan	150	Equipment
INV006	2025-09-07	Cafe Bene	9999	Food

Empty Vendor

Invoice_ID	Date	Vendor	Amount	Category
INV005	2025-09-06	nan	150	Equipment
